

Postdoctoral Opening
Smart Coatings
University of Illinois at Urbana-Champaign

A postdoctoral research position is available in the [Autonomous Materials Research Group](#) in the area of smart coatings supervised by Prof. Scott White (Aerospace Engineering). This position requires a strong experimental Background with expertise in polymer science and mechanical properties of polymers. This position will be part of a larger interdisciplinary team at the Beckman Institute for Advanced Science and Technology that is focused on the creation of novel materials systems with autonomous response.

Qualified applicants should prepare a single .pdf application file containing:

- (1) cover letter
- (2) a current curriculum vitae,
- (3) a one page statement of research interests and goals as a post-doctoral researcher,
- (4) a copy of one archival paper for which the applicant is first author. This paper should be representative of the applicant's best, most relevant work.

Applications should be submitted to: ams-postdoc@illinois.edu
